

TEST REPORT

Wahid Khan**Founder & CEO, LabEasy India Pvt. Ltd.**

At LabEasy India Pvt. Ltd., our vision is to make advanced, evidence-based diagnostics accessible to healthcare professionals and patients across India. We believe that personalized healthcare begins with accurate diagnosis, enabling clinicians to make informed decisions that improve patient outcomes.

The Food Print Microarray Test has become an integral part of our diagnostic services. With its advanced microarray technology and comprehensive food panel, it provides valuable insights into IgG-mediated food sensitivities, helping clinicians develop personalized nutritional strategies for patients experiencing chronic and lifestyle-related health concerns.

Over the years, FoodPrint has supported our mission of delivering high-quality diagnostic solutions by equipping physicians, dietitians, nutritionists, and other healthcare professionals with reliable, clinically relevant information. It has enabled us to assist thousands of patients in identifying potential dietary triggers and implementing targeted nutritional interventions as part of their overall clinical management.

As awareness of personalized nutrition continues to grow, FoodPrint stands out as a trusted and innovative diagnostic tool that bridges the gap between laboratory science and patient care. Its accuracy, consistency, and extensive food coverage make it an excellent choice for healthcare practitioners seeking to provide individualized, evidence-informed recommendations.

At LabEasy India, we are proud to collaborate with Omega Diagnostics in bringing the FoodPrint Microarray Test to the Indian healthcare community. Together, we remain committed to advancing precision diagnostics, supporting healthcare professionals with world-class testing solutions, and empowering patients to take informed steps toward better health and improved quality of life.
